

Frontend Engineer - Dohop - Coverletter

Reykjavík, 22 / 11 / 2025

Dohop ehf.

Nóatún 17. 105 Reykjavík.

Dear Dohop Hiring Manager,

I saw this job opening for Frontend Engineer at Dohop from [this ad on tvinnu.is](#) and wanted to put my hat in the pot.

I'm a software developer with a focus in frontend development. Although at my previous job at Acuo.is I had a more full-stack role where I was creating and implementing features for a Travel Agent Operations application both for the backend (using .NET Framework 4.6.2) and implementing a dynamic booking form using Next.js which is then displayed as an iframe to seamlessly integrate with WordPress websites. This application is meant for Travel Agencies that are still using Excel to manage travel packages and itineraries to help automate booking, creating flight- and hotel reports.

My passions are in creating simple and effective user interfaces while working with teams. I honestly crave some kind of mentorship and a feedback loop to help me improve as a developer.

I share **Dohop** values of;

- Making it (*the feature or fix or refactor*) happen
- Keep it simple
- Win as one - *I might need more experience in this department.*

and I resonate with what **Dohop** looks for in people. Such as "treat everyone with respect, regardless of their position in life" and "Solution-oriented and don't mind asking difficult questions" and well, the rest of them but I'm not going to list them all, haha.

I would love the chance to meet and talk about this possible employment opportunity and get to know each other better.

Kind Regards / Hljóðar Kveðjur,
Eysteinn Örn Jónsson.
